1. Problem Statement

Students in Tier-2 and Tier-3 cities lack exposure to diverse career opportunities beyond traditional fields like engineering and medicine.

Why is this a problem?

- Existing platforms like **Unacademy** focus only on academic content and do not provide **personalized career counseling**.
- Many students are **unaware of scholarships, internships, and skill-building programs** available to them.
- **Traditional career counseling** is expensive, inaccessible, and not tailored to individual interests.

Who is affected?

- **High school and college students** from Tier-2 and Tier-3 cities who have limited guidance on career choices.

How does this problem occur?

- Lack of **mentorship and awareness** about alternative career paths.
- Limited access to **career advisors** and **interactive guidance platforms**.

How big is the problem globally?

- Millions of students face **limited career guidance**, especially in **developing nations** where digital career counseling is still emerging.
- There is a growing demand for **affordable and accessible career advisory solutions**.

2. Existing solutions to the problem - Benchmark

Current career guidance platforms:

- **Unacademy, Byju's** → Focus on academics, not career matchmaking.
- **LinkedIn, Coursera, EdX** → Offer skill development but lack **career-specific mentorship**.
- **Traditional career counseling** → Expensive and not scalable.

Gaps in existing solutions:

- **Lack of personalized AI-driven guidance.**
- **No interactive features like games and career simulations.**
- **No real-time updates on scholarships, internships, and career trends.**

-

3. Proposed solutions

CareerWay - AI-Powered Career Guidance & Discovery Platform

Features:

- ✓ AI chatbot **talks to users like a mentor**, understanding interests and aspirations.
- ✓ Provides a **step-by-step roadmap** to reach career goals.
- ✓ **Career cards** allow users to swipe and explore different professions.
- ✓ Recommends **degrees, colleges, scholarships, and internships**.
- ✓ Integrates **career-related 2D mini-games** for interactive learning.

Example of games:

- **Cybersecurity** → Solve a simulated cyber-attack.
- **Mechanical Engineering** → Build a working gear system.
- **Graphic Design** → Create a poster in a timed challenge.

4. Market

Global Market Size:

The EdTech and career guidance market is growing rapidly, with AI-powered career counseling expected to reach \$2.5 billion by 2030.

Our initial focus is India's Tier-2 and Tier-3 cities, expanding later to other developing nations.

5. Competitive Landscape- Learn about competition – direct and indirect competition

Competitor	Strengths	Weaknesses
Unacademy	Strong in academics	No career counseling
LinkedIn	Good for networking	Not tailored for students
Coursera	Skill-based learning	No career roadmap or mentorship

- **Why CareerWay is Unique?**

- 🚀 Combines **AI, gamification, and interactive career exploration** to make career discovery engaging and immersive.

6. Customer Discovery & Validation

Target Audience:

- **High school and college students** from **Tier-2 and Tier-3 cities**.
- **Parents and teachers** looking for career guidance tools.
- **Ed-tech companies** looking for partnerships.

Customer Insights from Surveys & Interviews:

- **75%** of students felt **overwhelmed** by career choices and wanted **personalized guidance**.
- **60%** of students were **unaware of scholarships and internships** in their field.
- **82%** said **traditional career counseling was too expensive or unavailable** in their area.
- **70%** of students preferred a **gamified career exploration** over reading career guides.

Pilot Testing Feedback:

- Users loved the **swipe-based career cards** for exploring options.
- **AI chatbot** felt more engaging than traditional forms or static career tests.
- **Mini-games** helped students **experience careers firsthand**, making them more confident in their choices.

7. Value Identification

Unique Value Proposition:

-  **AI-powered career guidance** that's engaging, interactive, and personalized.
-  **Gamified career exploration** through career mini-games.
-  **Real-time updates on scholarships, internships, and industry trends.**
-  **AI chatbot mentor** that makes career discussions intuitive.

Feature	CareerWay	Unacademy	LinkedIn	Coursera
AI-Powered Career Chat	✓	✗	✗	✗
Gamification (2D career mini-games)	✓	✗	✗	✗
Real-time Scholarships & Internships	✓	✗	✗	✓
Career Roadmap	✓	✗	✗	✗

8. Product positioning

Market Category:

- **AI-powered Career Discovery & Guidance** platform.

Tagline:

 *The right way to the best career for you!*

How CareerWay Stands Out:

- ✓ **Fun & interactive career discovery** (not just passive content).
- ✓ **Personalized AI-driven recommendations** (not one-size-fits-all career lists).
- ✓ **Affordable & scalable career counseling** (compared to costly in-person advisors).

9. Desirability , Feasibility & Viability

Desirability (Do students want this?)

- Strong **survey validation** shows students want a **more interactive, AI-powered way** to explore careers.
- Early testers found the **career cards, chat-based guidance, and games engaging**.

Feasibility (Can we build it?)

- **Tech stack is clear** → React.js, Node.js, OpenAI API, Firebase, MongoDB.
- AI chatbot and recommendation system are **implementable using existing ML models**.
- **2D game development** is possible using **Unity, Phaser.js, or Godot**.

Viability (Can it sustain as a business?)

- **Freemium model** ensures mass adoption with a clear **subscription upgrade path**.
- **Ed-tech partnerships** provide **monetization through integrations & course promotions**.
- **Ad-based revenue** from universities and online course platforms.

10. BMC – One pager

Key Partners	Key Activities	Value Proposition	Customer Relationships	Customer Segments
- Ed-tech platforms (Udemy, Coursera)	- AI chatbot development	- AI-powered career guidance	- Personalized AI interaction	- High school & college students
- Universities	- Career roadmap AI	- Gamified career discovery	- Community engagement	- Parents & teachers
- Job & internship portals	- Scholarship aggregation	- Real-time career opportunities	- Mentorship marketplace	- Ed-tech companies

Key Resources	Channels	Cost Structure	Revenue Streams
- AI chatbot	- Website	- AI development	- Freemium subscription
- Career database	- Mobile app (future)	- Cloud hosting	- Course recommendations & affiliate marketing
- 2D mini-games	- Partnerships	- Content curation	- Ad-based revenue

11. Financials projected

Revenue Estimates

Year	Expected Users	Conversion Rate (Paid)	Revenue (USD)
Year 1	50,000	5%	\$75,000
Year 2	250,000	7%	\$450,000
Year 3	1,000,000	10%	\$2,000,000

Cost Estimates

Expense Category	Year 1	Year 2	Year 3
AI Development	\$20,000	\$25,000	\$30,000
Cloud & Hosting	\$10,000	\$15,000	\$20,000
Marketing	\$15,000	\$50,000	\$100,000
Game Development	\$10,000	\$20,000	\$30,000
Total Costs	\$55,000	\$110,000	\$180,000

 Break-even in Year 2 with a strong growth trajectory by Year 3.

12. What support do you need to get ahead / forward from here ?

Funding & Investment

- **Initial funding** to scale AI chatbot, **develop gamified experiences**, and **expand scholarship tracking features**.

Partnerships

- **Collaborations with ed-tech platforms (Udemy, Coursera, UpGrad)** for course recommendations.
- **Tie-ups with universities and career coaches** for mentorship integration.
- **Job platforms (Internshala, LinkedIn, Indeed)** for real-time internship listings.

Technical Support

- **AI optimization for better career recommendations.**
- **Game development expertise** to make career exploration **fun and interactive**.

Marketing & Outreach

- **Social media awareness campaigns** to attract students.
- **Webinars and partnerships with schools/colleges.**
- **Influencer marketing (YouTube, LinkedIn, career counselors)** to spread awareness.
