

CareerWay: Customer Discovery

Understanding our audience and
validating our solution

Problem Statement

- • Students in Tier-2 & Tier-3 cities lack exposure to diverse career opportunities.
- • Existing career platforms focus on academics, not personalized career guidance.
- • Many students are unaware of scholarships, internships, and skill-building programs.
- • Traditional career counseling is expensive and inaccessible.

Target Audience

- • High school students (Grades 9-12) exploring career options.
- • College students seeking internships, scholarships, and career roadmaps.
- • Parents & teachers who influence career decisions.
- • Ed-tech platforms & universities for partnerships.

Survey & Interview Findings

- 75% of students felt overwhelmed by career choices and wanted AI guidance.
- 60% were unaware of available scholarships and internships.
- 82% found traditional career counseling too expensive or unavailable.
- 70% preferred gamified career exploration over static career lists.

Market Validation

- India (Tier-2 & Tier-3 Cities) → 50 million+ students seeking career guidance.
- Global Market → 500+ million students (high school & undergrad).
- Growing demand for AI-driven career counseling solutions.

Pilot Testing Feedback

- • Users loved the swipe-based career cards for exploring options.
- • AI chatbot was engaging and felt like a mentor.
- • Mini-games made career exploration exciting and hands-on.
- • Strong interest in personalized career roadmaps.

Conclusion & Next Steps

- • Strong validation for AI-powered career guidance.
- • Next Steps:
 - - Expand user testing and refine AI chatbot.
 - - Develop more interactive career mini-games.
 - - Strengthen partnerships with ed-tech platforms and universities.
