

CareerWay - Value Proposition Canvas

1. Customer Segment

CareerWay is designed to help students explore and discover career paths through AI-driven guidance, gamification, and real-time opportunity tracking.

- High school students (Grades 9-12) who need guidance on career options.
- College students seeking internships, scholarships, and career growth.
- Parents and teachers who influence students' career decisions.
- Ed-tech platforms and universities looking for career guidance tools.
- Job platforms and companies looking for early talent pipeline.

2. Customer Pains

Students, especially in Tier-2 and Tier-3 cities, face major challenges when choosing career paths:

- **Limited Career Exposure:** Many students only know about traditional careers (Engineering, Medicine, MBA).
- **Lack of Guidance:** No personalized or affordable career counseling options.
- **Unawareness of Opportunities:** Many students miss out on scholarships, internships, and career-building

resources.

- **Overwhelming Choices:** Without structured guidance, students feel lost among too many options.

Pie Chart: Breakdown of Student Pain Points

3. CareerWay Gains & Solution

CareerWay addresses these problems by offering:

- **AI-powered career chat** – Understands student interests and recommends the best career paths.
- **Career roadmap builder** – Step-by-step guide on how to reach the chosen career.
- **Scholarship & Internship aggregator** – Helps students find real-time opportunities.
- **Gamified career exploration** – Career mini-games allow hands-on experience of different roles.
- **Multi-language support**– Expands accessibility to students in different regions.
