EDUCATION

Bachelor of Technology in Computer Science

PES University | Current CGPA:8.37 | Expected Graduation: May 2027

Aug. 2023 – Present

Bangalore, India

EXPERIENCE

Core Events Member, Neural Hive (AI and ML club)

PES University, Bangalore, India

Sep 2024 - Present

- Contributed to AI/ML projects and participated in deep learning workshops.

Core Tech Member, The Alcoding Club (Competitive Coding Club)

PES University, Bangalore, India

Nov 2024 - Present

- Actively participated in coding contests and problem-solving sessions.

Tech Member, IEEE SB

PES University, Bangalore, India

Aug 2024 - Present

- Engaged in ethical hacking, CTFs, and organised workshops and hackathons.

Concert Domain, Maaya' 24

PES University, Bangalore, India

Sep 2024 - Nov 2024

- Volunteered for organizing the annual intercollegiate techno-cultural fest of PES University.

TECHNICAL SKILLS

Programming Languages: C, Python, JavaScript, Verilog

Web Development: React, Node.js, Express.js, MongoDB (MERN Stack)

Cloud & Backend: Firebase, Vercel

Embedded Systems: ESP32, Arduino

Tools & Platforms: Git, Linux, Docker, Vite

Version Control: GitHub, Git

Statistics & Data Analysis: Python (NumPy, Pandas, SciPy)

PROJECTS

Voice Authentication Attendance System | Python, Librosa, PyDub, ECAPA-TDNN, Flask

- Developed a robust biometric attendance tracking solution using deep learning-based speaker recognition.
- Implemented a complete audio processing pipeline with noise reduction, feature extraction, and voice embedding analysis using the ECAPA-TDNN architecture.
- Enabled high-accuracy speaker identification via cosine similarity matching against a reference database for contactless attendance verification.

CareerWay (AI-based Career Guidance Platform) | React, Node.js, MongoDB, Gemini API

- Built a career recommendation system using Gemini API.
- Developed a Tinder-like career exploration UI.
- Implemented a chatbot for roadmap guidance.

Smart Water Management System | ESP32, Arduino, HTML, JavaScript, Wi-Fi, WebServer.h

- Designed a system to track water usage in real-time using ESP32 and a water flow sensor.
- Developed a web-based dashboard to display real-time flow rates and detect leaks.

StreamVibe (Web-Based Streaming Platform) | React, MongoDB, Node.js

- Built a streaming platform for video and screen sharing.
- Developed pages for streamers, viewers, and room creation.

Other Projects | Various Technologies

- A variety of additional projects, including games, security platforms, and IoT solutions. For more, check my GitHub: github.com/rtk5.

Additional Courses & Activities

- Completed 'The Complete Web Developer Bootcamp' on Udemy. Participated in 15+ hackathons and coding contests.
- Placed in the top 50 in the Good Coder competition. Attended multiple university workshops.
